

Professional Communication Lab/ Language Lab

The department is having well equipped Language Lab for the benefit of B.Tech students.

The language lab has fifty computers with internet connection and latest software loaded in them. Multimedia headphones are connected to all the systems. Other facilities in the lab include LCD projector, white board, and multimedia speakers. All the computers are linked using the **SENACO** software platform which contains different modules to develop the language skills of the students. Apart from this, the students are provided with authentic videos, audios, news etc. to develop their language skills. The students are also given practice in group discussion, interviews, grooming, and presentation skills.

In addition to this, students are given training in internationally recognized and approved tests like International English Language Testing System (IELTS), Test of English as a Foreign Language (TOEFL) and Business English Certificate (BEC).
